

Galo Sandoval

Full Stack Web Developer | Software Engineer

Walnut, CA | galo.sandoval.dev@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SKILLS

Front End: React.js, TailwindCSS, Redux, React Query, Jest, Typescript, JavaScript, HTML, CSS, Zod/Yup, Vite, Vitest, Next.js

Back End: Node.js, Express, tRPC, SQL, PostgreSQL

Additional: Agile Project Management, Algorithms, Architecture, Debugging, Deployment, Software Development Life Cycle

EXPERIENCE

BrightInsight, Remote - Software Engineer

Oct 2022- Feb 2024

- Optimized loading time for crucial screens, achieving a reduction of up to 5 seconds, and, in certain instances, instantaneous improvement
- Developed and implemented reusable components, including buttons, dropdowns, tables, and multilingual phone and text inputs, widely utilized across more than 50% of application files
- Played a key role in surpassing the 80% test coverage target across three distinct code repositories
- Demonstrated efficient task and bug resolution within Agile frameworks, consistently outpacing team members in delivery
- Increased software development efficiency by streamlining code within the library and its implementation, resulting in a notable 30% reduction in development time

BrightInsight, Remote - React Engineer

Jan 2022 - Oct 2022

- Frontend developer in an 8-member team dedicated to the development of Disease Management Solution, a large-scale enterprise web platform
- Successfully delivered and maintained key features, such as messaging, patient invitation, and onboarding, while optimizing API implementations to reduce onboarding time by 15%
- Improved team efficiency by documenting processes, facilitating accelerated development for colleagues
- Utilized expertise in React, TypeScript, and tools like Vite, Vitest, and TailwindCSS to contribute to the project's success

IBM, Remote - Application Developer Apprentice

May 2021 - Feb 2022

- Facilitated daily stand-up meetings to proactively address and troubleshoot technical challenges
- Implemented an enterprise-level project workflow, incorporating Agile Values and Practices, as well as DevOps methodologies
- Gained a comprehensive understanding of IBM's Hybrid Cloud Services through dedicated study and practical application

Go Get Em Tiger / G&B, Los Angeles, CA - General Manager

Feb 2017 – Mar 2020

- Enhanced operational efficiency across all store systems, streamlining administration and service flow
- Successfully secured two performance bonuses by implementing cost-saving measures, minimizing waste, and optimizing staff allocation
- Spearheaded the interviewing, hiring, and training processes for new personnel

EDUCATION

BloomTech Graduate of the Full Stack Web Development Program

2021 - 2021

- Completed a 6+ month immersive Computer Science & Software Engineering program at Lambda School
- Achieved hands-on experience in client and server testing while covering a comprehensive curriculum, including React, Redux, Node, Express, Jest, and Python

Fullerton Community College, Associates of Arts in Business Administration

2012 - 2014
